5 Gb of nausea. Man, there are a lot of resources to prevent nausea on VR games development, seems like you are using just none of them.

Here some examples:

Make something fix at the screen, like a virtual nose, as point of reference.

Make the way to transport through your scene by small teleporting\/jumping

Make the user move somehow to move around the scene, don't allow them to just sit and use a joystick control.

Do something! 5Gb of data to the trash can already. Sorry!
Without any of those any content within 7 min, you are ready to puke all over the place.. A very basic game with a far number of ships. Takes a entire new look at sea warfare. You have the best of them all. From Planes to Subs. The game has made them ballanced and far to play.. Fun little space arcade game reminding me of the yesteryears.
Gameplay is smooth.
UI is not buggy, other than the fact that whenever you get an achievement, the bottom right part of the screen gets glitched out.

I prefer the second ship for my gameplay style and I'm close to reaching the 100k score for the final achievement. (UPDATE: I've got this one too now, with the same ship)

The game is pretty easy but with time, unless you properly position yourself and shoot accurately, you will be overwhelmed. The background score sounds good too.

If the dev hasn't done so already, I hope he thinks about releasing this game on the Android, iOS and Windows 10 Mobile platforms too, because this has potential to be a fun game to play on the go.. Good time waster.. Shrek simulator. Buggy, but fun.

Best virtual reality game I've played so far the only problem is the glaive flying out of the arena and glitch game though the ground. But besides that it's great.. If Alien: Isolation were are movie, Phantaruk would be the overseas mockbuster.

Most annoying aspect of the game is long periods of uneventful walking simulation peppered with rare occasions where nearly inescapable enemies send you backward to checkpoints. It's easy to miss an antidote or code, meaning more frustration in replay than enjoyment.

Got to the Facehugger Nests and didn't bother completing.. I love Tetris very much, and this is the worst version of Tetris I have ever seen. Movement while holding down an arrow key is slow, meaning you must mash the arrow keys if you want to survive at high speeds. Rotation does not work very well, and the lack of a lock delay means that basic Tetris maneuvers do not work. But there's more! Absolutely-Legitimate-Non-Copyright-Infringementris has SURVIVAL MODE, which puts a bunch of random blocks in the way and then starts your first piece on top of one leading to an instant game over. This means that CLASSIC FUN COLLECTION has managed to do worse than Ubisoft's bad Tetris, since even when working as intended their Tetris is literally unplayable. Unforgiveable Tetris crimes, you should be executed. Very impressive, looking foward to future updates. a good few hours of gameplay as is. exploration of diffrent passing ships is spot on!. Exploring dungeons, killing goblins, necromancers etc. Lovely game :D.. This is a game from my childhood. If you didn't play the original, I doubt that you will like it. I would play Archon frequently with a friend. Basically, it's fantasy chess with "living" pieces. When a piece invades an enemy's square, you fight it out. It's simple, but fun.

There is one glaring flaw to the game. There is no remote play option. There is no excuse for not having, what is now, a very standard feature.. legends of quna epic track. Great game if you are a gridder fan. Great brutal combat, There is some grinding here, but doesn't detract from the overall gameplay. Great job on the developers' part on getting some quick fixes out there on some minor bug fixes.

Having fun and taking me back in time. Love it.. Love the simulation. Hard to learn, longer to build, and realism is at an Everest sized peak.
